(54) Title: OCARINA

(57) Abstract: Disclosed is an ocarina in which a musical performance can be performed with an accurate tone and rapidly, by solving problems that, in the case of an existing round type ocarina, various musical performance having high musical range is impossible because a width of the musical range is narrow and the angle of an airway must be changed when music of chromatic scale is performed. According to the present invention, the ocarina includes first to third toneholes (41, 42, 43) formed in the body (1) in a row, wherein the first to third toneholes can be held by three fingers among four fingers except for the thumb of the left hand, fourth and fifth toneholes (44, 45), which can be held by two fingers of four fingers except for the thumb of the right hand, sixth and seventh toneholes (46, 47) disposed adjacent to the fourth and fifth toneholes (44, 45), wherein the sixth and seventh toneholes (46, 47) can be stopped or opened at the same time when the fourth and fifth toneholes (44, 45) are stopped at place extended in the longitudinal direction of the finger, and eighth and ninth toneholes (48, 49), which are formed at the bottom of the body (1) and held by the thumbs of the left hand and the right hand.
